FYI - in case you've received this request or something similar, I will make sure the HF case studies and the Pavillion project are covered.

Hot Issues coming up in the next 60 days - please send input by noon Thursday, 07 February

The IOAA has requested that we compile a list of **high priority** actions through the week of April 1st. These are to include products, product milestones, speaking engagements, large meetings, etc. This list will be used for an upcoming one-on-one that the acting AA has with the Deputy Administrator. While the inclusion or exclusion of an item to this list is largely subjective, it should only be the "hot issues." I understand this is an information request so that there are "no surprises." If you are aware of any "hot issues" that may be coming up in the next 60 days, please send me a brief description of the issue or output and what the potential impact may be. If you are unsure the issues is a "hot" issue, send info on it anyway and we will let NRMRL management make a final decision before sending it forward.
